2002 HIGHER SCHOOL CERTIFICATE EXAMINATION

## Biology

Section I – Part B (continued)

Marks

Question 22 (4 marks)

The diagram shows a cell containing three pairs of chromosomes just prior to a *meiotic* division.

4

Assuming that random segregation occurs, construct a table that lists the possible genotypes that could be produced and states the expected frequency for each genotype.

Genotypes	Frequencies
E B G	9
E B g.	3
E b G	3
E b g.	1
