(d)

Start here.

31.

(d)(i) region x must have been damaged.  
and blood flow is crucial. maybe there  
hasn't been enough oxygen to the  
brain.

(ii) the mammal might have a permanent  
short or long term memory loss or  
even brain damage.

(e) technology is becoming more and  
more advanced each day  
these technologies are playing with  
our brains to form our desires whether  
it be a 3D movie or surround sound.  
these both help and make us individuals  
believe we are the | in the moment.
