

Good morning. Today I am here to talk about "Rocky Creek Regeneration Project" and looking for volunteers to involve in the Project.

The Rocky Creek Reserve is just 10 minutes walking from our school. Think back about when you guys were child and everyday life was adventure. I am sure that you guys went to the Rocky Creek Reserve and had enormous fun with all the of your family and other wild life. I am sure I did.

However, the most entertainable place around the school is no longer managed by our community and no longer used. Rubbishes and weeds are everywhere, plants and trees are getting less, barbecue facilities are unusable and picnic facilities are all destroyed.

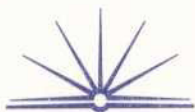

I am sure that we are all sad about it.

However, I recently ~~see~~ have seen the advertisement about the "Rocky Creek Regeneration Project" which is about people joined together as one and trying to put the Reserve back again to usable and entertainable place, ~~and~~ But in order to do that we need each of your hands, More hands we have. the earlier the Project done.

The project is starting over the next two weekends with a only few hours. It starts ~~at~~ each day at 10 o'clock. but you can come whenever you are convenient. You will do such work like, remove rubbish and weeds, plant native trees and repair berbeque and picnic facilities.

They are not hard work at all. But the more people we get, the less work we should do. So, ~~just give us your~~ ~~help~~ please give the Reserve help just before you go out to play in the weekends

and let's reproduce the place with our memories of child and let's make the most entertainable place in our area.

If you are interested to come, please contact me or. There is a free barbecue at Rocky Creek on Sunday 2nd December at 6pm to celebrate the project and thank you help

I am looking forward to see all of you on Sunday or contacting to me.

Thank you for your attention.
