

Section II, Q 3

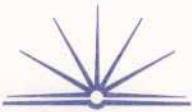

Good morning teachers and fellow students.

Today I ~~am~~ would like to talk to you about the Rocky Creek Regeneration Project. This project is an attempt to restore some of the damage done to the Rocky Creek Reserve.

This area is no longer used by our community because it has been turned to a rubbish dump. All the natural heritage is destroyed as a result of that and certainly it is not appealing to the eye.

In addition, ~~to~~ this reserve has become a source of dangerous insects and germs that is threatening our children as well as other forms of life there.

On top of that, the creek suffered ~~at~~

from a large amount of pollutants as a result of erosion and throwing rubbish.

Therefore, let's work together to make this once popular picnic area alive again. I think the results would be worth the effort put to it. Just a few hours over the next two weekends is just what it is required. I am sure that most of you are willing to offer such a great service that would be greatly appreciated by everyone in the community.

The tasks involved are simple. They include removing rubbish from the area, planting native trees and repairing barbecue and picnic facilities. The work will start at 10 o'clock each day but you are ~~is~~ welcomed to come ~~on~~ whenever it suits you.

Not to mention, that ~~I~~ all volunteers are invited to a free barbecue at Rocky

Creek on Sunday 2nd December at 6pm.

So, let us work together to save our environment and enhance our life standards, It will be beneficial to all of us and to all generations.

For further information, ~~you~~ contact Sue on 1800 623 004. If you want to volunteer and if you have any enquires, please ~~do not~~ not hesitate to ask me or any other student in the committee.

Thank you for listening.
