

The global changes in an ~~economical~~ activity
economical activity have changed the way i
look at a text i have studied.

~~Because~~

Car manufacturers, Because of the
rapidly ~~the~~ growing world, pollution has been
a big factor in the car manufacturing industry.

Because there is so much pollution being
caused by the cars the companies have been
pushed to come up with new technology
to meet the standards of the world and
its people.

Because of this there are consequences.

The prices of cars go up.

~~This effect~~ This starts a chain reaction
that affects all the people using ~~of~~ cars
and transport of this kind.
