

Question

21

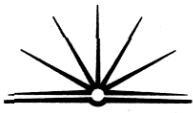

The role of World Cities is to hold a majority of the Trans National Corporations, banks, finance, media, advising. These are the three tiers. World, dominant and large which all run together and tries to make the most amount of money as possible and control all business things.

World Cities are London, New York, Tokyo. These are spread out over the world and they rely on time zones when one stock exchange opens one is about to close and one about to start they run together globally. So no stock exchange is ever closed.

The World City houses the headquarters for Trans National Corporations and they also have major law firms, media, Arts, everything important will be placed in these cities because they are important. They make the money for the country these cities make huge amounts of money and the majority of the country's income comes from these cities.

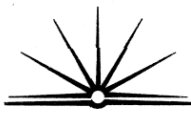

~~the~~ So they are very important. also they are the leader in telecommunication and transport. communication is very important without this the world would be know way of getting world around about what is happening on the other side of the world. and this could affect stocks and ~~and~~ this could cause a Wall Street crash again. Communication via the internet has led to communication and no more need for long distance travel with you can talk to someone across the other side world. ~~to help~~ Travel and transport these world cities will have to have an international airport with all the business that is going on and. ~~the~~ ~~me~~ or with major TNC. their business is done regular so transport needs to be fast.

The World Cities is linked with the climate world cities these are like: Paris, San Francisco. These are like a global network. These have a huge influence they have to also

have headquarters for TNC's and they make a lot of money for the Country these domestic worse cities have more finance and media law firms they don't have as much power but they still very important in the Global. Telecommunications and transport is still very good it have to be modern up to date to keep to ~~keep~~ on top of things in both World and domestic cities taking one on one is often used some people think it is quick and more accurate way to get the point across to people. The transport with international airports being existing in these places.

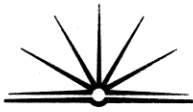

large world cities is the next tier and still holds major TNC's companies and has a huge role in global Network and providing money for ~~go~~ their country. large cities are ~~As~~ Sydney. You can see how ~~domestic~~ world domestic and large cities are and how they hold major TNC's In the Stimulus booklet Source J. it Shows how they can be every

distributed around the three tiers and how the communication network has to be good because it goes all over the world this is just from One TNC.

The large World Cities have also got major TNC and their telecommunication and transport has to be up to the high pressure of TNC's and it also has a huge effect on the country's economy.

* All three tiers of World Cities are eg. equally important but some are just bigger than others. They all have an effect on the global network and all have important roles in the country's economy. They all hold TNC and have the best telecommunication and transport available they provide the best number of jobs and make the most money. They provide for the other places like Sydney to Newcastle and everyone feeds off each other London to Sydney, Sydney, Newcastle

feeds of Sydney and poterson feeds of
Newcastle. they all help each other.
they all play there ^{own} role in the Global
Network.
