

Q22

I have studied Peppers mountain lodge resort in the blue mountains 100km west of Sydney.

The location of Peppers is convenient in the way of travel as it has helicopter landing space & it is a pleasant drive & not too far out of Sydney & its surrounding suburbs.

Environmentally it is placed near the 3 sisters & around a national park. This situation has caused up roar with local residents.

Ecological dimensions include the call for employment in a secluded area. Changes need so this enterprise will survive in future years.

Peppers is very environmentally friendly & people friendly. It holds functions, parties, weekends away.

Environmentally it doesn't pollute the near by national park in any way.
