a)

Economic feasibility - What amount of money and equipment is needed to support the online tutorial support? Will they have access to electronic books, teachers notes etc.

Time line - Who long will it take to get the project started, collect needed suplys and start up a client-tell.

A grant chart is needed to work out the structure time slots for each task required to canson complete.

b) The high school st students see a place in the market to help other fellow student attain better marks and grades.
The student will have to keep within copyright regulations throughout their businesses exsisting life.
They can not copy any text without consulting the author, and even then only small amounts of information would be ab allowed to copy.
They should state that the group accept no responsiblity for wrong or neglegent answers, as problem may

exsis result further down the track, with ~~student~~ the can student client's blaming the business for an inaccorrect answer.

The students should have written rules and regulations of their business that each and every one of them should follow. Stating that under no authority will any ~~tutor~~ student tutor complete or attemp to do a clients assignment, only support, ~~and~~ guideness, ~~and~~ tutoring and access to papers be ~~or~~ available.
