

23 a. Criteria that the group should consider are:

- ~~maintainance~~ * Aims and objectives of the new system.
- * Cost of setting up the new system.
- * Time it will take to set up the new system.

23 a. Criteria that the group should consider:

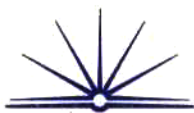

- * Aims and objectives of the new system.
- * Comparison of the cost of setting up the system and the returns received back.
- * Time frame of setting up the system.
- * Costs of training required.
- * The benefits of the information

system on workers

~~How many workers~~ * Whether it is technically feasible.

b. Thought needs to be given to the reliability and accuracy of data supplied. Tutors need to be up to date with the information they are giving to students. Books and teachers notes supplied should be checked for accuracy and validity. Copyright is also an important issue. Any ~~website~~ permission should be given to use certain information such as book and teachers notes. Any

web sites or books supplied
should be referenced properly
including authors name, date
of download and URL address.
