25a) i. The adavantage that a 'grandfather, father, son' back produce has is one that if some happens to the information there are three generation of backup dat saved to access and retrieve back the information lost another adavantage its less time comsuming since you dont have to save it on a different disk everyday if you want to keep back up files and also takes up less storage space to store the disks.

ii) These alternative procedures should be test periodically because the computerised transactions might be upgraded or change so the alternative produces should at least be test periodically to see if they are reliable to fall back on.

b) The website should have Information of what pies are available, decreasing mistakes on orders by email and facsimile, Staff should be divided at this so effenticy of entry data could be coldress on each having a sp___ Job and also credit cards should be processed when entered into the computer via the web Saving it down by hand or manually.

ii) To make the modification the web page has to be close down for construction, while it close the business would be lossing orders, another issue that may arise from the modification is if they are going to send there credit card number better security measure should be put in place for the protection of users information.

c) Online banking has a bigger risk of something going wronge, data accuracy, security and Intergity issues should be properly addressed. When a user desides to go online the his/her account details should be upto date of their lastest financial position eg If there is a mishke of how much mony their is in a account the use might think they can take sou out since there is enogh in there and this migh cause a overdraft because there might not be as much as her/she thought in the first place

Also Security issues are a main issue, Since anyone can access the net you dont want anyone in to your account so propely Security messure should be in place Such as firewall or password for everyt you get closer in to coming with contake Contake with your account and also Softy measure of your money because e transfer.
Some might transfer your funds to their

and data Integrity should be checked.
