

BOARD OF STUDIES
 NEW SOUTH WALES

g2) a) file server is storage of data, which information could be obtained.

b) data redundancy occurs in the location, ^{computer RAM, computer HD, phone extension, Room no.}
~~column~~ ~~columns~~ column (row) eg. Reception is repeated twice and manager's office is repeated twice. when ~~the~~ Mr Ferrano's database increases in size, more redundant data will be created and therefore harder to read, sort, and will take up much more space.

d.	computer info		Location.
	⇒ computer no.	Room no.	Room number
	computer RAM		Location
	com hard disk		
	phone extension		
	Room no.		
	Location
