

a) i) An LCD is a liquid crystal screen which is plate flat and thin and it contains a flat images of an image when viewed on the screen. A CRT is an ordinary monitor and the picture quality isn't as sharp as an LCD monitor and this is due to the fact that an LCD monitor is flat and a CRT is more round.

ii) Cell based animation - is when each ~~frame~~ single frame's movement is done through animation ~~for~~ movements and path based the animation stays the say because the frames stay the same.

b) i)

$$\begin{aligned} \text{b) ii) } \quad \text{File size} &= \frac{\text{Byte} \times \text{Width} \times \text{Depth}}{8 \times 1024} \\ &= \frac{16 \times 600 \times 400}{8 \times 1024} \\ &= 468.75 \end{aligned}$$

16 = Byte

600 = Width

400 = Depth.

eg: 16<sup>colours</sup> represents bytes  
} 600 pixels represents Width.  
} 400 pixels represents Depth

c) WWW.regionclassified.com.au, displays advertisements for individuals and companies and advertisements are made through fax, email and post. Advertisements are charged by the number of words and photos and attachments are additional fees. Advertisements are displayed for 28 days and are removed automatically after that. And they are put into categories so they can be easily found. The collecting process in terms of the information system is done with company who runs www.regionclassified.com.au.

That the data in this company is collected and when the customer pays for each word and picture in the advertisement, then the collection process is being successfully carried out. Advertisement collectibles are stored for 28 days only and then they are removed.

The organising process of ~~an~~<sup>the</sup> information system has seen the organisation ~~of~~ and arrangement of Advertisements being displayed in a specific and in a sequential order routine.

The ~~pro~~ process of displaying the advertisement in the information process of the system involves the advertisements being displayed with words and the more letters used the more expensive the advertisement. The displaying of colour, pictures, photos and graphics is a very effective graphical method to persuade people into ~~buy~~ keeping in contact with the person in charge of the advertisement and yet again this is even more expensive and this indicates

That the person promoting the advertisement really wants customers and that they really are determined business people.

Search facilities on the internet can make more people view your advertisements.

Displaying accurate ~~information~~ graphical information can and will result ~~and~~ in more customers contacting the person who ~~is~~ is in charge of the business being advertised.
