

ii) Albert Speer believed that he was not involved in any thing about the extermination of Jews.

Historians believed that he was involved in concentration camps of Jews and slavery of Jews, resulting in 3.5 million innocent people dead. His "unawareness of the importance of anything else" and his dedication to his country and his leader resulted a mass-destruction and killed many innocent people.

Even though Speer still denied the involvement ~~of~~ to "purification of Germany", such an intelligent man like him who was the minister of armament who personally dealt with most of the situation cannot be seen as an innocent man. Although his impression and accomplishments are outstanding he killed many people and remain to think as an patriotic get. The dedication to his beloved Nazi regime.
