

Question 7

The criteria used to determine Australia's priority health issues are

- A ✗ social justice principles, potential for prevention and morbidity rates.
- B ✗ priority population groups, life expectancy and social justice principles.
- C ✗ cost to individual and communities, mortality rates and social justice principles.
- D ✓ social justice principles, priority population groups and prevalence of condition.

HSC Statistics on this Question:

	Band 1/2	Band 2/3	Band 3/4	Band 4/5	Band 5/6
A	20%	20%	12%	7%	2%
B	24%	18%	11%	4%	0%
C	27%	22%	14%	8%	3%
D	30%	40%	63%	81%	95%
N	0%	0%	0%	0%	0%

The table and graph show, for the groups of students whose marks in the examination corresponded to the borderline between two bands, what percentages of each group selected the responses A, B, C and D. N is used to identify: No valid response.

Note that apparent anomalies in the table and graph, such as 0% or 100% of students choosing a particular response, can occur when there are no students (or very few students) who scored the particular examination mark associated with that borderline.
