

- (b) Argue the benefits of applying the Ottawa Charter to ONE health promotion initiative.

Applying the Ottawa Charter to one health promotion initiative, eg Cardiovascular disease, would greatly benefit individuals and communities, by creating supportive environments in smoking for example, with things such as the 'Quitline' these supportive environments can focus <sup>on</sup> this one group lowering fatalities in smoking, in turn this would also decrease deaths and cases of a much larger group, ~~and~~ of people with Cardiovascular disease. By applying the principles of the Ottawa charter to one health promotion initiative we can concentrate all forces need in solving this one health issue.
