WORK + LEISURE

c) *Advances in technology could mean less work for people. Machinery replacing man, seen both in a good & bad way. New technology for a large manufacturing company can be beneficial as it can save money & resources. An employee however, may lose their job.

* Technology allows people to work overseas, or from home or pretty much anywhere.

* Technology also allows people to communicate & keep in touch more efficiently. Chat sites, social network sites, webcams & email are all some of the ways people stay in touch. The impact on leisure means that you can have an instant conversation with someone, whenever & where ever you want.
