Question 15 - Work and Leisure.

(c) Technology has already impacted individuals for their work and also their leisure time. The internet is a major change for those people at work, by providing them with the access and technology to get tasks done, in a quicker way. For example if an individual needs useful information to complete a task that needs to be done, Instead of going to all the trouble and accessing books, the individual can use the internet. This has impacted a lot of workers, as it saves more time, and gets things done quicker. It also gives them an option to work home with the access of internet.

Technology has impacted individuals for their leisure time, as if they are bored and don't have anything to do they can play a game or watch a movie, This will keep them accompanied for a couple of hours.

Technology ^{upgrades} ~~upgrades~~ all the time. It will have a major impact on individuals in the future. As technology gets more useful everytime it would upgrade. It would be very helpful for individuals in the future, as it makes a lot of tasks easier for most people. And also saves a lot of time. Technology could impact individuals at work as it may have different devices to get their job done. And makes their time sufficient, by getting done on time and not have to worrying about anything going wrong.

It will also impact individuals and also young children, as technology changes rapidly. New playstations games, mobile phones, and many more devices may change in the future. Letting all individuals enjoy, and relax by playing/doing something they enjoy. New forms of technology will also impact all individuals as they won't have to play the same game or games over and over again. New technology in the future provides individuals with a variety of choices to choose from.
