Start here.

Equality & Difference are defined differently, within Australia and the Indigenous Australians they are treated differently. Today still several Indigenous are treated unequal to the rest of normal Australians.

Until recently, the Indigenous were given an apology for the ~~Indigenous~~ stolen generation that the affected many Indigenous families. Now also the Indigenous also are given more help & accesses such example is Abstudy which helps the Indigenous receive a tertiary education and have them treated like regular ~~Indigenous~~ Australians.

The non Indigenous aren't given any special ^{assistance} ~~provisions~~ like that, this can result in inequality amongst the two groups. This is very similar to Karl Marx's conflict theory that ~~shows~~ ^{demonstrates} ~~the~~ ~~conflict~~ between two classes in society. ~~Example~~

To maintain the impacts that are occurring between the two cultures, is to incorporate both groups into ~~the~~ having equality between both races.

Such examples that could be used are national sorry day and when Ex prime minister ~~would~~ apologised. Also they are trying to push forward that the Indigenous are able to work in a very similar work environment that non Indigenous works for.

This is a linking example of how the ~~Indigenous~~ Indigenous Australians shouldn't be typecasted and treated like they are second class citizens

Still today racism is a large portion of society within and between cultures and how many different cultures don't deserve to be given the same opportunities as any other member in a society.

With the indigenous they are given plenty of benefits and able to receive them through it either being able to go to university, get payments off centerlink and help themselves that need help. With their education, or payments to ~~go~~ buy needs for survival.

It is found that a large number of indigenous still are underprivileged and struggle to find help, access to services. They need plenty of support and ~~help~~ advice, access to services when given.

It is also a norm of free will if they are able to do whatever they want & whenever they can receive it. Freedom of speech is ~~per~~ permitted with ~~them doing what they want~~ ^{having the freedom of speech} as the same as non indigenous's whom have free will to do whatever they want, and aren't judged; Any more with what they do.

Conflict theory that relates to conflict between two status and class in the ~~society~~ society in this case, the aboriginal and the non aboriginal
