

IMPORTANT PROJECT MANAGEMENT TECHNIQUES

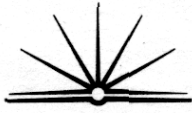

Question 21

(a) Technique 1: Have your project team be a

Shared resource ^{environment} ↓ listen to ~~everyones~~ everyone's ideas &
~~don't bag people out~~ ~~(put anyone down)~~ don't bag (put people down)

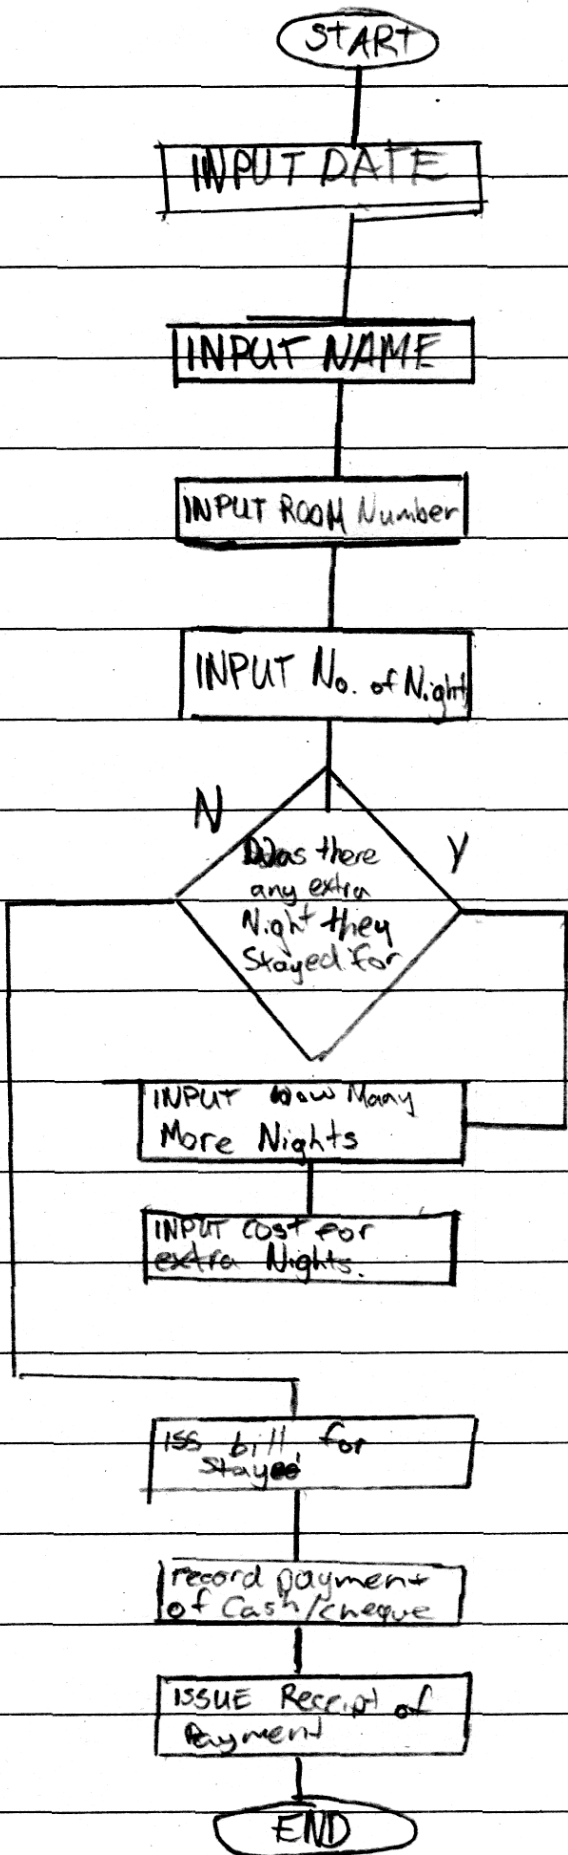

other people's ideas & but don't put up with people who are always Negative no-one likes to listen to people who always try to bring up the Negative aspects of that Project.

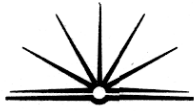

Technique 2: Also have the public/company (who ever it's for) be involved with the concept of the project After all that who the project's for, try to do as much as you can that the people want & if it is too hard to do just Advise them about the ~~the~~ problems that may occur if the software is not up to what they (the people/company) was expanding

6

Strategies 1 : One of the strategies is that the Organisation can take the pressure off the Employer by having a Day wear they can Bring in Cake & stuff for half a day and relax

21

(iii) By showing the reviewer ^{the} old way they took
Reservation so if there is anything the person
missed out of can be incorporated into the
New System.
