

## Question 15: Properties + Performance of Textiles

- (A) Machines these days do everything for ~~is~~ us. So why not advance in the field of textiles. NO we have machines that ~~turn~~ turn cotton balls in to shirts. Machines for dying, printing + sewing.
- (B) There is not much in the world that a machines cant do for us. it is cheeper to run a dying or a print machine then to employ 200 people to do the job. The machine gets in there + does the job + gets it right the first time so the less time that you spend on trying to get it right the ~~more~~ ~~the~~ performance ~~will be better~~. better the performance will be.
